SPC Milestone Plugin Notice

When installing the SPC Milestone plugin onto any Windows Server operating system you will be required to install a Microsoft Redistributable Package.

Microsoft Visual C++ 2010 Service Pack 1 Redistributable Package MFC Security Update. To start the install process, Open the "CPlusPlusRedistributable" folder included in this package and run the vcredist_x64 executable.

You can also download the files for the link below.
https://www.microsoft.com/en-us/download/details.aspx?id=26999

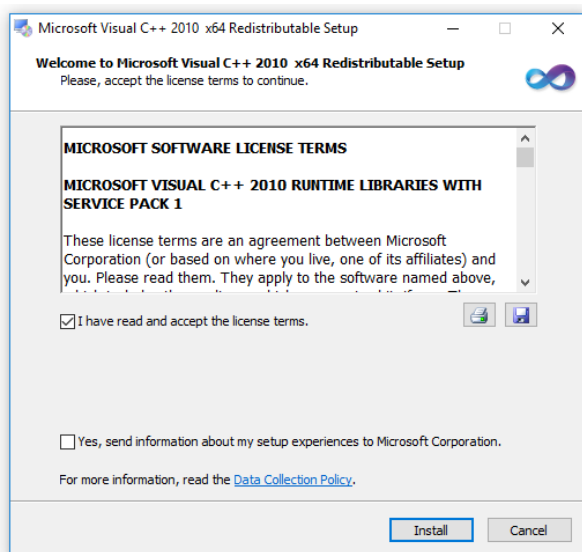

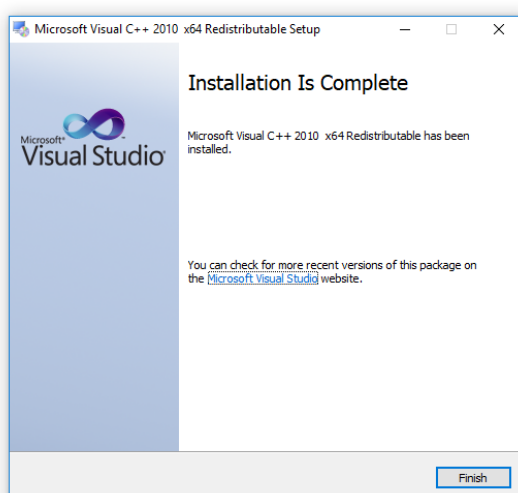

Click on the download button. This will give you several options.
Select vcredist_x64.exe and click next.

Save the executable file to a known location on the server.
Run the .exe file

After agreeing to T&C, click on the install button

To complete the installation, click on the Finish button.
